Welcome Message

Namaskar,

It takes us a great pleasure to invite you to attend “**Regional Meet of ISGE** (International Society for Gynecologic Endoscopy), in association with Indian Association of Gynecological Endoscopist (IAGE) **STAR 2018**” to be held between from 6th September to 10th September 2018 at Hotel JW Marriott, Pune.

The theme of the Conference is **STAR** (Spaces, Techniques, Advances, Research).

You will see a galaxy of 25 International Faculty from all over the world and 200 National Faculty.

The highlights of the Conference are:

1. 6 Pre-Congress Workshops
2. IAGE- ISUOG workshop on Colour Doppler
3. Live relay of Laproscopic Surgery from Europe
4. Masterclass in Urogynaecology by Dr. Prof. Ajay Rane
5. Luncheon with International Faculty
6. Live operative Relay from Ruby Hall Clinic to Hotel JW Marriott
7. Live Cadaveric Dissection Relay from Bangalore Lab
8. Post Congress IAGE Workshop - Live Anaesthetised Animal- Dissection & Endosuturing
(in Mumbai)

The weather in Pune during the month of September is pleasant & blends well with the academic ambience of Ruby Hall Clinic & Hotel JW Marriott, Pune. See you all in Pune. Cannot miss STAR.

So keep 6th to 9th September 2018 marked in your diary & register for the Conference at the earliest.

For conference details, please visit www.star2018.com

See you in Pune.

Objectives: Due to an event in the United States in recent years, the place of myomectomy, particularly when morsellation is involved has been severely questioned. The incidence of malignant change in myomas has been quoted to be as high as 1:380 and this has been the yardstick used to warn many a gynecologist off the removal of what otherwise was thought to be a benign tumour.

Various national and international societies have drawn guidelines to help the practising clinician make educated decisions as to managing what had previously been considered a benign disease.

This workshop brings together international experts to discuss this current challenge and hopefully help the attendants steer their way through the muddle that has arisen over recent times.

1. Introduction and overview - Peter Maher
2. Preoperative assessments and indications for removal –Lilo Mettler
3. Does medical management have a place? - Bimal John
4. Surgical options and approaches – P. G. Paul
5. Does laparotomy still have a place? When is big too big? - Prakash Trivedi
6. LMS-fact or fiction? - Ellis Downes
7. Have we been brain washed? Are plastic bags the answer? - Mala Raj
8. The dust is settling on the LMS issue or is it? What is the wayforward? – Lip Kee Yap

Geeta Kolar

Kaishreen Khan

Learning objectives: Upon completion of this course, the delegates shall be able to

1. Choose appropriate USG machine and probes for Doppler
2. Sample the vessels for ultrasound in Obstetrics & Gynecology
3. Interpret the Doppler indices
4. Make Doppler guided decisions in Obstetrics & Gynecology
5. Improve fertility treatment outcomes by understanding fundamentals of Dopplers in Infertility and Gynecology
6. Improving perinatal outcomes by enhancing the understanding of Doppler in obstetrics
7. Increasing detection rates for vascular and cardiac abnormalities in the fetus by understanding their blood flow patterns

Who should attend?

- Radiologists performing advanced obstetrics and Gynecological ultrasound
- Obstetricians performing Ultrasound – Dopplers shall aid decision making
- Infertility specialists – Optimal use of Doppler in infertility enhances success rates
 - Fetal medicine specialists
 - Pediatric Cardiologists

Benefits for registered delegates:

- ISUOG CORE MEMBERSHIP WORTH 5,500 INR (included in the delegate fee)
- ISUOG CERTIFIED COURSE COMPLETION CERTIFICATE

Palette 1- Basics & Physics of Doppler

How to choose the correct ultrasound machine, correct probes and apt setting
Fetal circulation

Palette 2- Normal fetal Doppler sampling – Trimester wise

1st trimester : Ductus Venosus, Tricuspid regurgitation, Uterine artery

2nd trimester : Fetal heart (Shall be covered below)

3rd trimester: Umbilical artery, Middle cerebral artery, Ductus Venosus, Aortic Isthmus, Uterine artery

- Doppler in Fetal growth restriction: Interpretation and decision making

Palette 3- Doppler in special situations

(Doppler in Rh Negative pregnancy)

Doppler in special medical conditions (Auto-immune diseases, preterm/PPROM, maternal diabetes)

Doppler in non-cardiac vascular defects; Vein of Galen, Chorioangioma, Umbilical vein varix, other fetal defects)

- Doppler in multifetal gestation

(Monochorionic & Dichorionic pregnancies: Interpretation of Doppler and decision making)

Palette 4- Cardiac Doppler

Doppler in normal fetal cardiac evaluation

Doppler for fetal cardiac defects

Palette 5- Doppler in Infertility & Gynecology

PANEL DISCUSSION: Doppler: Adding colour to life & Ultrasound

Case based panel discussion on 1 case from each of the above lectures
